PROFESSIONAL SUMMARY

Senior Software Engineer / Frontend Engineer with 6+ years of experience building enterprise-scale web applications, Single Page Applications (SPAs), admin dashboards, SaaS platforms, and reusable UI systems. Strong expertise in React.js, JavaScript, TypeScript, REST API integration, component-driven architecture, and frontend architecture. Hands-on experience with Micro Frontend Architecture, Module Federation, design systems, performance optimization, Agile/Scrum development, and cloud-integrated applications. Experienced in collaborating with international clients and cross-functional teams to translate business requirements into scalable technical solutions.

CORE SKILLS

Frontend Development: React.js, Next.js, TypeScript, JavaScript (ES6+), React Hooks, Redux Toolkit, Context API, TanStack, Zustand, React Query, Micro Frontend Architecture, Module Federation (Webpack 5, Vite), HTML5, CSS3, SCSS/Sass, Tailwind CSS, Ant Design, Material UI, Bootstrap, Chakra UI, NextUI, Framer Motion, Three.js, Storybook, SPA

Cloud & Deployment: AWS S3, CI/CD Pipelines, Cloud-Integrated Frontend Applications, Amazon Cognito

Full Stack Development: Node.js, Express.js, MongoDB, REST API Development, API Integration, Authentication & Authorization, JWT

Rendering & Performance: SSR, CSR, SSG, ISR, Component-driven Architecture, Performance Optimization, Responsive Design, DOM, Accessibility (a11y)

Testing & Quality: Vitest, React Testing Library, Cypress, Jest, Storybook, Unit Testing, Component Testing, Integration Testing, End-to-End Testing, API Mocking, Test Automation, Regression Testing, Code Reviews, Debugging, Performance Testing

Engineering Practices: REST APIs, Microservices Integration, JWT Authentication, Firebase Auth, Code Reviews, Performance Optimization, Debugging, Production Monitoring, Agile/Scrum

Version Control & Collaboration: Git, GitHub, GitLab, Bitbucket, Jira, Confluence, Slack, Microsoft Teams, Trello, Notion

Platform APIs & SDKs: WhatsApp Business API, Google Maps & Location APIs, Payment Gateways (Razorpay, PayPal, Stripe), Auth (Cognito, Firebase Auth, JWT)

AI-Assisted Development: GitHub Copilot, Claude Code, ChatGPT, Cursor, Antigravity IDE, AI-assisted code generation, debugging, refactoring, unit test generation, documentation, code review.

PROFESSIONAL EXPERIENCE

Senior Software Engineer | Aufait Technologies (09/2023 – 08/2026 | Calicut, Kerala, India)

City of Johannesburg (COJ) — Admin Panel Platform

- **Pikitung Incident Management Panel:** Developed a full-featured admin dashboard for municipal waste and service teams, enabling staff to create, triage, assign, escalate, and close incidents through streamlined digital workflows.
- **Designed the UI** to support real-time ticket tracking, status updates, and SLA monitoring, while integrating role-based access controls so teams only interacted with relevant tasks and data, improving operational response and coordination.
- **City Information & User Management Panel:** Delivered admin tools for user management and content publishing with approvals, analytics, and scalable CRUD features supporting large datasets.
- **Implemented unit and component testing** using Vitest and React Testing Library, covering reusable components, hooks, user interactions, form validations, and critical business logic to improve application reliability.
- **Built and maintained reusable component documentation** and interactive test scenarios with Storybook, helping the team validate UI components in isolation and maintain consistency across the application.

Technologies: React.js, TypeScript, JavaScript, Micro Frontend Architecture, Module Federation (Webpack 5), REST APIs, Microservices, HTML5, CSS3, Tailwind CSS, Vite, React Testing Library, Cypress, Storybook, AWS S3, CI/CD pipelines, cloud-integrated frontend applications, Amazon Cognito

SaaS Design System (design.systems)

- Developed a SaaS-based design system with Figma integration, custom domain support, type-scale generation, and real-time notifications, including core design tokens and a large component library with a production-ready Figma file.

Technologies: HTML, CSS, React 19, JavaScript, Pusher, SDK

Triveni Turbine Ltd — Engineer Portal & Admin Panel

- Built the engineer portal and admin panel with solver configuration, IDE-style model execution, a DXF viewer, and local data download/management tools.

Technologies: HTML, CSS, Tailwind, React, JavaScript, Three.js

Olo — Admin Panel (Lead Developer)

- Built the end-to-end Olo admin panel covering orders, services, users, vehicles, wallets, rewards, analytics, and roles, enabling complete operational control from a unified dashboard.

Technologies: HTML, CSS, Tailwind, React, JavaScript

Click4Marry.com — Portal & Admin Panel (Lead Developer)

- Led development of both the user portal and admin panel for a large-scale matchmaking platform.

Technologies: HTML, CSS, Tailwind, React, JavaScript, Firebase, Chat, React Native

Other Projects & Activities

- Led frontend development for the U25 UI project under Q8Cars, delivering responsive, production-ready features.
- Supported the wider engineering team through code reviews, mentoring junior developers, and promoting best practices in React and modern tooling.
- Assisted multiple squads with critical production troubleshooting, including SSL and deployment issues for Sugoid, a Japan-based client project, helping unblock releases and maintain system stability.

Software Developer | Neoito (06/2021 – 08/2023 | Ernakulam, Kerala, India)

- Contributed to multiple client and internal projects across real estate, SaaS, AI, and logistics domains.
- Led frontend development for PropertyOK, building the admin panel and core UI workflows to support real estate operations and team activities.
- Served as a developer on Happile.io, enhancing a WhatsApp Business API platform used to automate marketing, sales, and customer support interactions.
- Built key features for NextPort, an AI-driven shipping and logistics platform, focusing on the admin interface and operational dashboards.
- Supported internal initiatives including performance monitoring tools and time management applications, collaborating across teams to improve engineering productivity and delivery efficiency.

Technologies: HTML, CSS, Tailwind, React, JavaScript, Next.js, Bootstrap, Vue.js, React Native

Software Developer | Talrop Pvt Ltd (07/2020 – 05/2021 | Ernakulam, Kerala, India)

- Developed and delivered end-to-end product experiences for Steyp, an EdTech platform empowering students to become skilled engineers and scientists.
- Conducted offline and online Robotics/IoT classes, training 100+ students.

Technologies: HTML, CSS, Tailwind, React, JavaScript, Next.js, Bootstrap, Vue.js, React Native

EDUCATION

M.Sc. in Computer Science, University of Calicut (2018 – 2020)

Bachelor of Computer Application, University of Calicut (2014 – 2017)

LANGUAGES

English, Malayalam
